

TBRS 365

Mitigate risk of data loss

Ensure to back up your M365 data with an external provider & ensure the highest level of security and compliance for your data.

Customer Challenges

Zero tolerance for downtime and data loss

Keep backup data safe from ransomware

Meeting compliance and retention goals

Recovery despite storage and staff constraints

Protecting company & keeping data under control with second on-premise backups

Business challenges

+85 % of businesses are using virtualization technologies

+50 % already have resources running in public clouds; hybrid is growing

Remote work growth accelerated the adoption of Collaboration Suites like Microsoft 365

Increase in Cyberthreats is making new victims on a daily basis

It is now time **to adapt your data protection approach** to the new hybrid/multi cloud data distribution paradigm.

Data owner duty

Regardless of whether the data is on-premise or in cloud infrastructure/SaaS such as Microsoft 365, ultimate responsibility of data protection lies with the **customer or the data owner – you.**

TBRS 365 allows you to backup M365 applications (Exchange, SharePoint, OneDrive and Teams) in EBRC Tier IV Data Centers in Luxembourg.

- Self-service or managed backup solution
- Protect from accidental deletion, security threats and retention policy gaps
